PROFILE

Computer Science undergraduate (BSc) specializing in Artificial Intelligence at the University of Hertfordshire with hands-on experience in AI, software development, databases, web development, and embedded systems through internships and technical projects. Skilled in Python, SQL, Java, and JavaScript, with certifications in AI, Data Science, and Cybersecurity. Passionate about building impactful solutions and solving real-world problems.

EXPERIENCE

AI Intern at Innovera | Cairo, Egypt

July 2026 – Present

- Selected for **Innovera's AI Track** Summer Internship, gaining hands-on experience in artificial intelligence and machine learning.
- Applying Python and AI concepts through practical projects, technical training, and collaborative problem-solving.
- Working with mentors and fellow interns to strengthen software engineering, analytical, and AI development skills.

IT Intern at TecnoGroup | Cairo, Egypt

May 2025 – June 2025

- Completed a **1-month intensive internship** in the IT Department, gaining hands-on experience in troubleshooting, system maintenance, and technical support.
- Assisted in deploying and configuring software updates across 50+ workstations, ensuring system security and optimal performance.
- Collaborated with the IT team to document technical procedures, improving departmental knowledge sharing.

Teacher Assistant (ICT IGCSE) | Cairo, Egypt

Nov 2023 – April 2024

- Tutored 20+ students in **Python, HTML, and databases** for IGCSE ICT.
- Graded assignments/quizzes and gave feedback to improve scores.

EDUCATION

University of Hertfordshire | Cairo, Egypt

Oct 2023 – Present

BSc Computer Science – Artificial Intelligence

Expected Graduation: 2027

Edison International Academy | Doha, Qatar

Sep 2021- June 2023

IGCSEs: *High School Diploma Overall: 87.14%*

ADDITIONAL TRAINING

Completed and certified Complete Python Mastery	03/06/2025
Completed and certified Introduction to AI by HP Life	18/05/2025
Completed and certified Data Science & Analytics by HP Life	19/08/2024
Completed and certified Introduction to Cybersecurity Awareness by HP Life	19/08/2024
Completed Understand the Basics of Code by Google course	19/08/2024
Completed and certified English Duolingo test with a score of 120/160	27/08/2023

SKILLS

Programming Languages: Python, Java, SQL, JavaScript, C++, C, HTML, CSS, Bash

Artificial Intelligence & Data: Machine Learning, Data Analysis, Object-Oriented Programming (OOP)

Software Tools: Visual Studio Code, PyCharm, Oracle APEX, Arduino IDE, Cisco Packet Tracer, Microsoft Office

Professional Skills: Problem Solving, Teamwork, Communication, Public Speaking, Active Listening, Adaptability

Languages: Arabic (*Native*), English (*Fluent*)

TECHNICAL PROJECTS

Smart Farming System (May 2025)

- Built a smart farming simulation to monitor soil, weather, and crop health using object-oriented programming.
- Applied inheritance, modular design, event scheduling, and dynamic data management.
- **Technologies:** Python, OOP

Obstacle Avoidance Robot (March 2026)

- Developed an autonomous robot capable of detecting and avoiding obstacles using ultrasonic sensors.
- Programmed real-time navigation and motor control on an ESP32 microcontroller.
- **Technologies:** ESP32, Arduino C++

AutoFixer (May 2025)

- Collaborated on developing a responsive website for electric vehicle repair booking.
- Developed a responsive user interface and contributed to improving the vehicle booking experience.
- **Technologies:** HTML, CSS, JavaScript

Smart Transportation & Ticketing System (December 2025)

- Designed an object-oriented transportation management system with ticketing, scheduling, and fare calculation.
- Applied OOP principles including abstraction, encapsulation, inheritance, and polymorphism.
- **Technologies:** Java

Smart Healthcare Clinic Network (March 2026)

- Designed a secure two-floor healthcare network using VLANs, ACLs, DHCP, NAT, and inter-VLAN routing.
- Configured and tested network connectivity using Cisco Packet Tracer.
- **Technologies:** Cisco Packet Tracer

Car Rental Management System (March 2026)

- Developed an object-oriented car rental platform supporting booking, payments, contracts, and rental tracking.
- Designed a modular architecture to ensure scalability and efficient workflow management.
- **Technologies:** Java

University Course Registration System (December 2024)

- Designed and developed a normalized database for managing students, courses, instructors, and enrolments.
- Built an interactive Oracle APEX application with dynamic forms, reports, and SQL queries for academic insights.
- **Technologies:** Oracle SQL, Oracle APEX

Password Generator & Strength Analyzer (December 2024)

- Developed a secure password generator with customizable password length and complexity.
- Implemented a real-time password strength checker using regular expressions and security best practices.
- **Technologies:** Python
